INTRODUCTION

As a constitutional state that based on Pancasila and the Constitution of the Republic of Indonesia Year 1945, the Republic of Indonesia shall perform law enforcement that reflects fairness, certainty, and the maximum benefit for the purposes of the protection of law, order and welfare of the people. To support the success of law enforcement, it takes the authentic evidence of the circumstances, events, or the legal actions undertaken by certain positions, namely by the notary as a public official. Law No. 2 in 2014 and No. 30 of 2004 concerning Notary about the change that has been imposed on Reglement op Het ambt in Nederlands Indie (Stbl. 1860: 3) or Notary position Regulation (PJN).

Notary as a public officials is a professional explanations should be believed that the signature and seal can provide a guarantee and as a strong evidence, as well as an independent party in a legal education without blemish. In Article 1 paragraph 1 of the next Act No. 2 of 2014 on changes to the Act No. 30 of 2004 concerning Notary (UUJN) stated that the Notary is a public official who is authorized to make an authentic deed and other authorities referred to in this Act.

of Law No. 2 in 2014 and jo 30 year 2004 concerning about Notary that states that: makes the deed not make a letter, such as Surat Kuasa Membebankan Hak Tanggungan (SKMHT) or make other letters, such as Certificate of Inheritance (SKW). Moreover, it is confirmed that a Notary is appointed and dismissed by the government, meaning that Notary in performing their duties and appointed by the Minister of Justice and Human Rights. Although administratively notary appointed and dismissed by the government, it does not mean being a subordinate of the government notary, but notary in performing their duties must be independent, impartial to anyone, and do not depend on anyone.

Today, rolling cases involving law notary has been made possible because of his position in violation of Code of Professional Ethics, the Regional Supervisory Council may even protect the notary so it was not allowed to testify in court. Maybe there is a person who has violated the principle of Notary that is accuracy or participate faith and violated the deed office in making authentic example in the purchase agreement and so on. Code of Ethics for Notary very important in their profession, because of the nature and essence of the work is very oriented notary legalization, the legal basis of the status of the property, rights, and obligations of the clients who use the services of a notary.

NOTARY OBLIGATIONS AND AUTHORITY

The presence of a notary is very important in the midst of people's lives. Notary guarantees certainty, order and protection of the public regarding the law on an authentic deed. The authentic act is indispensable in every aspect of community life. Making authentic document containing the formal correctness in desperate need of help and services of a notary deed so authentic it will be understood and accepted by all parties as well as more legal certainty in the midst of society.

The notary, in their profession, should really be able to provide good services to the community so that no disadvantaged communities. Therefore, a notary is required more sensitive, honest, fair and transparent in making a deed in order to ensure all parties involved directly in the making of an authentic deed.

Notary is a profession that would require a rule of professional ethics of the profession in the form of a code of ethics. The position of a code of conduct for notaries is extremely important, not only because the notary is a profession, but also because of the nature and the nature of notarial work oriented legalization, so it can be a fundamental element of the primary law on the status of the property, rights and obligations of the clients who use the services of as a notary.

In relation to the provisions of Law No. 2 year 2014 and No. 30 Year 2004 concerning about Notary above, you should use good and true Indonesian for the notary deed if in case the client do not understand the language used in the deed, the Notary is obliged to translate or explain the contents of the deed in a language understood by the client. In performing the duties of Notary has a basic principle held that in assessing a presumption of lawful deed or better known as presumptio iustae causa, meaning deed made by Notary shall be considered legally valid until the deed stating invalid. In addition, the Notary in a deed does not investigate the truth of the letters submitted by the party making the deed. It is intended that the notary as a public servant can act quickly and appropriately and stating whether or not a
letter or legitimate case of forgery is not authorized by the Notary, so Notary only check administrative completeness to make a deed.

Behaviors that must be owned by the Notary profession are: (1) a steady moral integrity; (2) honest, and (3) aware of the limits of their authority. So, the notary must comply with the provisions of applicable law on how far he can act and what should and what should not be done. If the forbidden provisions have been violated, the deed will lose the authentic power. A notary who Pancasilaist, he must have a solid moral integrity; honest, and aware of the limits of their authority and also have a sense of justice that is essential, is not affected by the amount of money, and not merely formal evidence pursue creating legal certainty, but ignore the sense of justice. Code of Conduct also play an important role as a means of social control, in addition to preventing control or interference by the government or by the community is also a code of ethics also play a very important role in the development of the profession of notary to the extent possible to prevent misunderstanding and conflict.

Notary in performing his duties required to be guided by the rules and regulations in force. In carrying out his obligations specified either in the Act No. 2 in 2014 and No. 30 of 2004 concerning Notary, in particular in Article 16 and Law No. 2 in 2014 and No. 30 of 2004 concerning Notary and Notary Code of Ethics Indonesian Notaries Association, which the notary in the run position, shall act honestly, thoroughly, independently, a sense of responsibility and must also apply the principles of accuracy in any action to be performed. However, from the analysis conducted in the notary's ability to perform its obligations is not optimal because it has not kept pace with product quality certificate in accordance with the provisions of the legislation. It can be inferred from the presence of a notary deed disputed by the parties.

In carrying out his duties of a notary must hold fast to the notary office code of ethics, because without it, the dignity of professionalism will disappear altogether⁴. According to Bertens, professional code of ethics is a set of norms and accepted by professional groups, who directs or gives guidance to its members how it should be done and at the same time ensuring the moral quality of the profession in the public eye⁵.

Notary as a profession has a code of conduct created by the Notary Organization in Indonesia or known by the Indonesian Notaries Association (INI). In Indonesia, Notary Code of Ethics has been established a few rules that must be held by a notary (in addition to Law No. 2 in 2014 and No. 30 of 2004), which are⁶:

It certainly can not be denied because if education just about technical skills without professional responsibility and ethics, of course, will result with the profession would be illegal because he was not able to carry out their profession in a professional manner. It would cause a great loss to the legal profession as a whole with. Notary in running position has the authority, obligations and prohibitions. Authority, obligation and prohibition are the core of the practice of notary. Without these three elements, then the office of the notary profession and become useless.
